

# QuietPrint™

## QUIETPRINT™ IS ACOUFELT'S PROPRIETARY, HIGH-QUALITY PRINT TECHNOLOGY.

---

Our QuietPrint™ technology allows us to apply high-resolution images to our smooth, sound-absorbing FilaSorb™ felt without compromising its acoustic properties.

# WHEN PRINTING ON ACOUSTIC MATERIAL, THERE IS OFTEN A TRADE-OFF BETWEEN PERFORMANCE AND RESOLUTION.

Many high-resolution printing techniques involve laying down a hard-setting paint or ink over the top of the base surface. This can result in a filling of the gaps in the porous surface of an acoustic material. With QuietPrint™, each fiber is colored with high precision, ensuring the airgaps in our FilaSorb™ acoustic material remain open to absorbing sound.

## The QuietPrint™ Difference

Some printing techniques create an impenetrable layer that reflects sound, causing reverberation and echo.

Acoufelt's QuietPrint™ technology colors the fibers with high precision, whilst ensuring airgaps remain open to absorbing sound, creating a high-resolution image.

1912 Collection Panels – Louis – Sand

## Key Features

-  Printing method has no substantial impact on acoustic performance
-  Super fine fibers to achieve a smooth surface appearance
-  Superior breathability
-  Excellent resistance to fire
-  Thermal efficiency
-  Anti-static treated – reduced dust cling
-  Certified low VOC
-  20 year lightfastness warranty
-  Highly customizable

## Technical Details/Finishes

- Dimensions – 1220 x 2800mm & 1200 x 2800mm
- Thicknesses – 12, 24, 25 & 30mm
- NRC – 0.45 - 0.85
- Custom sizing available
- Custom prints available

## YOUR CUSTOM QUIETPRINT™

We encourage you to speak to our design engineering team to help bring your custom printing, cutting, coloring, bevelling and shaping designs to life. Can't find the print you're looking for? Provide us with your own custom images and graphics for print on our acoustic FilaSorb™ material.

For all custom images, please supply at a resolution of minimum 50DPI. Images supplied at 300DPI will yield a perfect image. Contact our team with your design vision and we'll help to calculate your required resolution, or source the desired image on your behalf.
